Today's Points:

- 1 AI learns from a lot of data.
- 2 AI helps us think, create, and solve problems.

1 AI learns from a lot of data.

Main Idea:

AI learns by looking at many examples—words, pictures, sounds, and patterns.

It does not “understand” like humans, but it is very good at finding patterns.

Because of this, AI can answer questions, understand language, and make predictions.

2 AI helps us think, create, and solve problems.

Main Idea:

AI does not replace our thinking.

Instead, it supports us by writing text, explaining ideas, translating languages, and creating images.

AI makes hard tasks easier and helps us finish work faster.

3 Lesson Summary

①What AI Can Do

Understand and write text

Translate

Summarize

Explain things simply

Create images

Suggest ideas

②Why AI Is Useful

Works fast

Works anytime (24/7)

Works with us

Helps beginners and experts

Never gets tired

Makes difficult tasks easier
