Today's Points:

- 1 ChatGPT is an AI that understands your words.
- 2 ChatGPT helps your learning, teaching, and work.
- 3 ChatGPT works on both PC and smartphones.

1 ChatGPT is an AI that understands your words.

Main Idea:

ChatGPT is an AI created by  **OpenAI** .

It reads your text, understands the meaning, and gives answers, ideas, or explanations.

It learns from large amounts of data and finds patterns.

As of 2025, it is widely used around the world.

2 ChatGPT helps your learning, teaching, and work.

Main Idea:

- Write emails and reports
- Translate languages
- Summarize long texts
- Fix grammar and improve sentences
- Create images
- Explain difficult topics simply
- Give ideas for lessons and work

3 ChatGPT works on both PC and smartphones.

Main Idea:

You can use ChatGPT:

- On a PC (web browser)
- On a smartphone app (Android / iPhone)

The app allows speaking, sending photos, and quick translation.

4 Registration (2025)

① Open <https://chat.openai.com> or

② Select “**Sign Up**”

③ Register with email / Google / Microsoft

④ Confirm email

⑤ Start using free

⑥ Install the app if needed

4 Registration (2025): Free vs Paid (as of 2025)

Free Plan	Paid Plan (20–30 USD/month)
Uses older AI models	Uses the newest AI models (GPT-5 / 5.1)
Slower responses	Faster and more accurate
Some tools are limited	More tools (images, files, voice, etc.)
Good for basic learning and simple tasks	Better for teachers and heavy users
